Assembled Chemical Weapons Alternatives

Greetings from ACWA

A Partnership for Safe Chemical Weapons Destruction

Today's Agenda:

- ACWA Program Overview and Schedule
- Video: *U.S. Chemical Weapons Destruction: Progress in Motion*
- Retaining Chemical Demilitarization Experience
- Current Status
- Moving Forward

ACWA Leadership Team Grows: New Deputy Joins Technical Director Position Added

Posted on February 25, 2015

Staffing changes at the Program Executive Office, Assembled Chemical Weapons Alternatives (PEO ACWA) headquarters are increasing depth of experience as the organization continues to prepare for chemical weapons stockpile destruction near Pueblo, Colorado and Richmond, Kentucky.

Don Barclay, who most recently served as U.S. Army Chemical Materials Activity director, has joined the team full time as deputy program executive officer (PEO). Barclay was previously the site project manager at the Umatilla Chemical Agent Disposal Facility in Oregon and was also responsible for U.S. Army support to PEO ACWA.

Joe Novad, who previously served as deputy PEO, will assume a new role as the ACWA technical director, with primary responsibilities in the areas of risk management and systems engineering.

"These actions permit Don to devote his attention to getting the ACWA plants operating, something with which he has plenty of experience," said PEO Conrad F. Whyne. "Joe's role as technical director retains the critical ACWA institutional memory and allows him to be that set of vigilant eyes the program needs to manage the constantly evolving technical risks and opportunities."

Whyne said he remains focused on the success of the program, and the senior staff changes help align the organization with that goal.

Pueblo Chemical Agent-Destruction Pilot Plant Current Status

A Partnership for Safe Chemical Weapons Destruction

Destruction Technology:
**Neutralization/
Biotreatment**

Explosive Destruction
System Operations Began:
March 2015

Pilot Plant Construction
Status: **100% Complete**

Pilot Plant Operations Begin:
2015

Pilot Plant Systemization
Status: **77% Complete**

Anticipated End of
Destruction Operations:
2019

PCAPP

As of April 2015

Pueblo Chemical Weapons Inventory

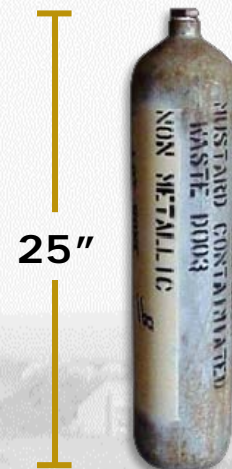

A Partnership for Safe Chemical Weapons Destruction

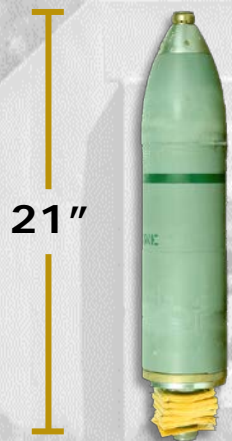

Munition	Agent Type	Destroyed (as of 12 May 2015)
4.2-inch Mortar	HD	--
4.2-inch Mortar	HT	--
105mm Projectile	HD	81
155mm Projectile	HD	--
Department of Transportation Bottles	H/HD/HT	10
Total		13 (.12 tons)

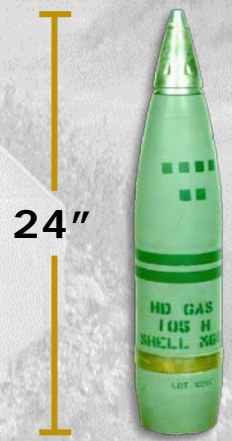

155mm Projectile

DOT Bottle

4.2-inch Mortar

105mm Projectile

Blue Grass Chemical Agent- Destruction Pilot Plant Current Status

A Partnership for Safe Chemical Weapons Destruction

Destruction Technology:
**Neutralization/
Supercritical Water
Oxidation**

Static Detonation Chamber
Operations Begin: **2017**

Pilot Plant Construction
Status: **93% Complete**

Pilot Plant Operations Begin:
2020

Pilot Plant Systemization
Status: **31% Complete**

Anticipated End of
Destruction Operations:
2023

BGCAPP

As of April 2015

Program Executive Office
Assembled Chemical Weapons Alternatives

Blue Grass Chemical Weapons Inventory

A Partnership for Safe Chemical Weapons Destruction

Munition	Agent Type
M55/M56 Rocket	GB
M55/M56 Rocket	VX
8-inch Projectile	GB
155mm Projectile	VX
155mm Projectile	H

Static Detonation Chamber: Mission

A Partnership for Safe Chemical Weapons Destruction

Anniston's Static Detonation Chamber (SDC) will:

- Be used to train Blue Grass Chemical Agent-Destruction Pilot Plant's Static Detonation Chamber personnel
- Dispose of Pueblo Chemical Agent-Destruction Pilot Plant uncontaminated energetics

Program Executive Office
Assembled Chemical Weapons Alternatives

Moving Forward

A Partnership for Safe Chemical Weapons Destruction

Blue Grass Chemical Agent-Destruction Pilot Plant construction complete

Start of main plant operations at Pueblo Chemical Agent-Destruction Pilot Plant

Start of Static Detonation Chamber operations at Blue Grass Chemical Agent-Destruction Pilot Plant

Program Executive Office
Assembled Chemical Weapons Alternatives
